OPERATING PERFORMANCE

During the financial year, the company was operating mainly in the capital market. The year witnessed the BSE sensex & the Nifty touching an all time high, followed soon by the American financial market crisis, which cumulated into sentiment turning bearish for the capital markets. During the last quarter of the financial year, the capital market, after 4 record years of upswing, showed signs of fatigue. Since January' 2008, the Indian Capital Markets has been passing through a turbulent times. Outlook for the capital markets have turned negative. The bearish trend continued during the first quarter of the current financial year. With the growth story of the Indian economy waning out, and with the Indian economy showing sign of cooling down, the outlook for the current financial year appears negative.

After recording satisfactory results for the first 3 quarters, the company suffered huge losses from capital market operation during the last quarter. With most analysts predicting that the BSE Sensex may touch 12000 the outlook for the current year appears bleak.

During the year, your Directors continued to focus on new opportunities to improve profitability. Your company successfully assisted a U.S. based, blank cheque company, in acquiring a minority stake in a Indian financial service conglomerate. MANAGEMENT DISCUSSION AND ANALYSIS

Economic Scenario

The Indian Economy registered a growth of 9% during 2007-08, slightly lower than the 9.4% achieved in 2006-07, but topping the 9% mark for the third year in succession. However, some early signs of slowing momentum started to emerge towards the latter part of the financial year. Industrial growth estimated at 8.1% is significantly lower than the 10.6% achieved in 2006-07, with growth in the manufacturing sector at 8.8% being sharply lower than the 12.1% recorded in previous year. Growth in the services sector is also estimated to have dropped to 10.7% as against 11.2% in 2006-07, worryingly manufacturing growth dropped to 5.8% in the last quarter of the year. Inflation remains an area of genuine concern. Inflation, based on the wholesale price index (WPI) stood at 7.4% at end-March 2008 as compared with 5.9% at the end of the previous year and has since crossed 8%. The fiscal deficit has been estimated at 3.10% of GDP, lower than the budgeted level of 3.30%, helped mainly by buoyancy in tax revenues.

The Indian Capital Market recorded it's all time peak during the financial year. However, during the last quarter of the financial year the Capital Market corrected sharply, led by downturn in Global Economy and severe financial crisis in U.S. financial sector. Foreign Institutional Investors pressed distress sales in the Indian Capital Market, further sharpening the fall in prices.

Business Outlook

While the outlook for the Indian economy continues to remain positive, the growth trajectory is likely to moderate. Rising food and commodity prices across the world, volatile financial markets and a diminished risk appetite among international investors are bound to have their impact on the Indian economy. The recent developments in the stock markets have also dampened the earlier buoyancy and optimism in the economy. With inflation hovering around the 8% mark, liquidity is likely to be constrained and interest rates are unlikely to ease. With the outlook of the capital market not too rosy for the current financial year, the performance of the company is likely to be muted from capital market operation. Your Company's strategy would be to focus more on non fund based and advisory services. A good beginning has been made & the management would thrive to take it forward by setting up a full pledged advisory desk.

Analysis of performance for the year

The detailed highlights of the performance are produced elsewhere in the Director's Report.

Opportunities and Threats

Over the years, your Company has achieved an appropriate balance between risk and returns by setting up an efficient risk mitigation system to meet various forms of financial and other risks. The Primary risks that the company is exposed to are market risk and operational risk.

STCL has in place suitable mechanisms to effectively reduce such risks. All these risks are continuously analyzed and reviewed at various levels of management through an effective information system. STCL recognizes the importance of risk management on account of market volatility in Capital Market business.

Development in human resources

During the period under review, your Company maintained healthy, cordial and harmonious relations at all levels of management. The company's culture promotes high performance and high professional standards. Your Directors record their appreciation for this hard work and efficiency of the employees & senior management team...

Conclusion

Statements in this "Management Discussion and Analysis" describing the company's objectives, projections, estimates, expectation or predictions are to be viewed with caution and judicious understanding as the Company's operations involve inbuilt risk due to uncertain economic conditions and unforeseen events beyond the company's control.
